Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Election/Restrictions

Claims in the application are 1-20.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

5 I. Claims 1-9, drawn to a method for repair and restoration of damaged , diseased or aged cartilage, classified in class 424, subclass 93.7.

II. Claims 10-20, drawn to a method for treatment and regeneration of injured, damaged, diseased or aged articular
10 cartilage, classified in class 424, subclass 423.

The inventions are independent or distinct, each from the other because:

The methods of the claims of inventions I and II require different steps and/or conditions such that each method can be
15 performing without the other. The method of invention I requires steps a)-b), whereas the method of invention II requires steps a)-h). The method of invention I is drawn to repair and restoration of cartilage, whereas the method of invention II is drawn to treatment and regeneration of articular cartilage.

20 Examining inventions I and II together will be a serious burden due to different searches and considerations for applying prior art required due to differences in the scope and content of the claims of inventions I and II.

Because these inventions are independent or distinct for the
25 reasons given above and have acquired a separate status in the art in

view of their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be
5 examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically
10 point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or
15 species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

20 Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a

request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
